ABSTRACT

The Hello Doc - Personal Medical Assistant is an all-in-one solution for Health care. This application is mainly developed using PHP and MYSQL. Hello Doc comes with personal assistant to reach out nearby qualified doctors. Helps in locating the nearby hospital, recommend specialized doctors and appointment fixing programs.

Hello Doc keeps all the medical history in one place. It allows the users to keep track of their medical history and allows physicians to better understand user's concern, even if they visit several hospitals. Hello Doc also organizes all of users Lab and scan reports in one place, makes it easy to manage.

With the assistance of experienced medical professionals, Hello Doc will answer to all the user's health related questions. Hello Doc also provides live consultations from highly qualified doctors as the users sitting at their own home.
